Game Objective

Crazy Balls is an incredible live game show that brings the excitement of Crazy Time's unique Bonus games with big multipliers to a popular bingo-style game.

Place your bets on different cards, get amazing multipliers, then watch the ball-drawing machine select 20 random balls.

The game's objective is simple — to match the drawn balls with the numbers on your cards and complete lines to win. But be prepared for the wild excitement of our four awesome Bonus games — Coin Flip, Cash Hunt, Pachinko and Crazy Time!

Game Rules

Betting phase

Place your bet on one to four regular cards or on any of the Bonus game cards. Next, the 5x5 cell regular card/s you bet on randomly generate numbers ranging from one to 60. Similarly, any Bonus game cards you bet on are filled with three to five randomly generated numbers: you get three numbers on a Coin Flip card, four numbers on a Cash Hunt and Pachinko card, and five numbers on a Crazy Time card. You can switch each regular card between being a Free Space card and being a Multi card.

- Free Space card: The centre cell is a "free space", which acts as a drawn number and increases the odds of making a line.

- Multi card: The centre cell is guaranteed to have a multiplier, meaning increased odds of a higher payout, but a lower chance of making a line.

Main game

After betting time is over, the game host will press a button that will place random daubs (Free Spaces) and multipliers on the cards you bet on. A daub acts as a drawn number, but a multiplier has a chance to increase your winnings. All cards can receive Free Spaces and Multi card multipliers.

Multipliers are activated when one or more balls corresponding to the number with the multiplier on the card are drawn.

Three types of Multi card multipliers can be generated:

- Standard (10x or 20x) — if a winning line includes a number with a Standard multiplier on the card, your winnings are multiplied by that amount. Multiple Standard multipliers in a winning line are added together before applying the multiplication.
  For example, if you place $ 5 on a card with a winning line and a standard multiplier of 10x and a second standard multiplier of 20x, the calculation will be $ 5 x (10x + 20x) = $
  150.

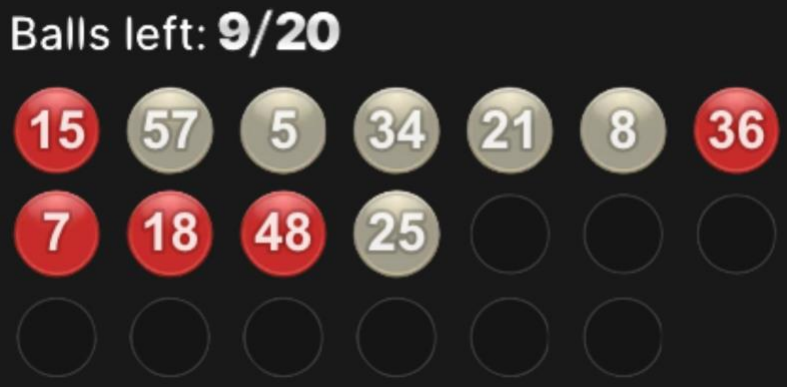

- Line (20x or 50x) — if a winning line includes all numbers and a Line multiplier, your winnings are multiplied by that amount. Standard multipliers in the winning line are added to the Line multiplier before multiplication.

For example, if you place $ 5 on a card with a winning line, a Line multiplier of 50x and a Standard multiplier of 10x, the calculation will be $ 5 x (50x + 10x) = $
300.

- Global (2x or 3x) — if you get a number with a Global multiplier, your winnings for all lines on that card (including any Line or Standard multipliers) are multiplied by this amount. The winning line does not need to contain the Global multiplier, and each card can have up to two Global multipliers.
  For example, if you place $ 5 on a card that has a number with a Global multiplier of 2x (and that number gets drawn), the winning line has a Standard multiplier of 10x and a Line multiplier of 50x, the calculation will be $ 5 x (10x + 50x) x 2 = $
  600.

If you complete a line on a card, the bet on that card wins.

Bonus Games

Place a bet on Coin Flip, Cash Hunt, Pachinko or Crazy Time cards for a chance to enter the captivating Bonus games! If you get all the numbers on a Bonus game card, you win that bet, and the Bonus game will begin once the ball-drawing machine completes drawing all 20 numbered balls for that game round. You can place bets and participate in the Bonus games regardless of whether you place any bets on regular cards.

If you bet on several Bonus game cards and get all the numbers for all cards, you can participate in several Bonus games per game round.

Additionally, Bonus game cards may receive Free Spaces and Bonus multipliers that will multiply all the existing Bonus card multipliers (if the card has received a multiplier). The maximum amount of possible extra Free Spaces for Bonus cards is up to one for Coin Flip, two for Cash Hunt and Pachinko, and three for Crazy Time. The extra multipliers can range from 2x to 50x for each Bonus card.

For example, if the Cash Hunt Bonus card won a 100x multiplier and got an extra 10x Bonus multiplier, the winnings are 1,000x.

Please note that it is not guaranteed to get Bonus multipliers on all Bonus cards every round.

Whether your bet activates one or more Bonus games, the Bonus games always follow this order: Coin Flip, Cash Hunt, Pachinko, and Crazy Time.

Coin Flip

“Heads or Tails” — let the coin decide! A red and blue-sided coin is flipped in this thrilling Coin Flip Bonus game. Multipliers are randomly assigned to each side of the coin and displayed on a TV screen.

This Bonus game can receive additional Bonus multipliers that multiply the existing Bonus card multipliers. New multiplier values are updated on the screen.

Once the final multiplier values are revealed, the game host will activate the coin launcher to start the flip of a coin. The side facing up is the winning side, and the multiplier obtained is applied to your payout.

Occasionally, as a surprise, a Rescue Flip might occur if the assigned multipliers are low. The coin is then flipped again.

Cash Hunt

In the Cash Hunt Bonus game, a wall of 108 random multipliers is generated and displayed on the screen. The Cash Hunt Bonus game can also receive Bonus multipliers, which are applied to all 108 multipliers before being covered by random symbols and shuffled. As the countdown starts, aim at the symbol you believe is hiding the largest multiplier.

When the time is up, the cannon fires, revealing all covered spots, and you will see the multiplier you have won.

If no decision was made during the decision time or any interruption occurred, the decision will be made automatically and the spot in the wall will be picked randomly.

Pachinko

The Pachinko Bonus game features an exciting multiplier wall, containing a random puck drop zone at the top and 16 random multipliers in the landing zone at the bottom. The puck is dropped randomly from zones 4 to 13. Before the puck is dropped, all the multipliers are multiplied by the assigned Bonus multipliers. Follow the puck dropping through pegs and landing on your lucky multiplier.

If the puck lands on the DOUBLE, all the multipliers are doubled. The drop zone is randomised, and the puck is dropped again until it lands on one of the doubled multipliers or on DOUBLE again! See your winnings get multiplied and enjoy!

If the puck lands on DOUBLE numerous times and all multipliers have reached a value of 10,000x, DOUBLE is replaced by the 10,000x multiplier.

Occasionally, as a surprise, a Rescue Drop might occur if the puck landed on a 2x, 3x or 4x multiplier. In this case, the drop zone is randomised and the puck is dropped again. If a Rescue Drop occurs, all lower multipliers are increased to match the value of the previous multiplier the puck landed on.

Crazy Time

What's behind the secret red door? It's the world of the Crazy Time Bonus game in which there's a gigantic 64-segment wheel with three flappers and nothing but Crazy Bonus multipliers on it! If a Bonus multiplier is won, all values on the Crazy Time wheel are multiplied by it.

Make your decision and choose your flapper — green, blue, or yellow — within the decision time.

If no decision is made during the decision time or any interruption occurred, the decision will be made automatically, and a flapper picked for you randomly.

Then the game host spins the wheel.

Once the wheel has stopped, each flapper points to a different segment. You win the multiplier at your chosen flapper, and it is applied to your winnings instantly.

Crazy Time means crazy potential winnings! If one of the flappers stops on the DOUBLE segment, then for those players who have picked that flapper, all multiplier values on the wheel are doubled, and the wheel is spun again for them.

If the wheel stops on the DOUBLE segments many times in a row, and all multiplier values have reached 20,000x, the DOUBLE segments are replaced by 20,000x multipliers.

Payouts

Bet Spot	Payout
Free Space card	2–39:1 per line
Multi card	2–199:1 per line
Pachinko	Bonus Game
Cash Hunt	Bonus Game
Coin Flip	Bonus Game
Crazy Time	Bonus Game

The base payout per winning card without any multipliers is 3x. If two or more lines win without multipliers, then their payouts are summed (for example, if your card wins with two lines without any multipliers, your multiplier for that card is 6x). However, if your winning card has a Standard or Line multiplier, this multiplier replaces the base multiplier (for example, if your card wins with a line that has a 10x multiplier, your multiplier for that card is 10x).

Maximum payout for all your winnings within a game round is limited to $500,000. The game round continues even if your maximum payout limit is reached. The maximum payout limit is applied only at the end of the game round.

Please note that any malfunction voids the game round and all eventual payouts for the round. Bets will be returned.

Return to Player

The optimal theoretical Return to Player (RTP) is 96.10% based on the Free Space and Multi card. See below the RTP for each bet separately without the max payout cap applied.

Bet	RTP
Free Space card	96.10%
Multi card	96.10%
Pachinko	95.68%

Bet	RTP
Cash Hunt	96.09%
Coin Flip	96.49%
Crazy Time	95.54%

Players may achieve a “win” in excess of the maximum payout, but this will result in their actual win being capped. As a result of the cap, players betting the maximum will have the following RTPs: Free Space Cards: 96.10%, Multi Cards: 96.10%, Coin Flip: 95.61%, Cash Hunt: 95.62%, Pachinko: 94.84%, Crazy Time: 94.88%.

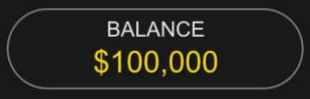

Volatility Index: 9.90 (High).

Place Bets

The BET LIMITS panel shows the minimum and maximum allowed bet limits at the table, which may change from time to time. Open the Bet Limits to check your current limits.

To participate in the game, you must have sufficient funds to cover your bets. You can see your current BALANCE on your screen.

In the Immersive view, the TIMER informs you of the duration of betting time. After it expires, betting is closed and no more bets are accepted.

In the Classic view, the TRAFFIC LIGHTS tell you the current status in the game round by informing you when you can bet (GREEN light), when betting time is nearly over (YELLOW light), and when betting time has expired (RED light).

The CHIP DISPLAY allows you to select the value of each chip you wish to bet. Only chips of denominations that can be covered by your current balance will be enabled.

Once you have selected a chip, place your bet by simply clicking/tapping the appropriate bet spot on the game table. Each time you click/tap the bet spot, the amount of your bet increases by the value of the selected chip or up to the maximum limit for the type of bet you have selected. Once you have bet the maximum limit, no additional funds will be accepted for that bet, and a message will appear above your bet to notify you that you have bet the maximum.

NOTE: Please do not minimise your browser or open any other tab in your browser while betting time remains and you have placed bets on the table. Such actions may be interpreted as leaving the game, and your bets will therefore be declined for that particular game round.

The REPEAT button allows you to repeat all bets from the previous game round. This button is available only before the first chip is placed.

The DOUBLE (x2) button becomes available after you have placed any bet. Each click/tap doubles all your bets up to the maximum limit. Note that you must have a sufficient account balance to double ALL your placed bets.

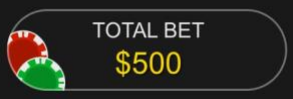

The UNDO button removes the last bet you placed.

You can click/tap the UNDO button repeatedly to remove bets, one by one, in the reverse order in which they were placed. You can clear all your bets by holding the UNDO button.

The TOTAL BET indicator displays the total amount of all bets placed in the current round.

Autoplay

Once you have placed a bet, Autoplay allows you to repeat your selected bet or bets for a chosen number of game rounds.

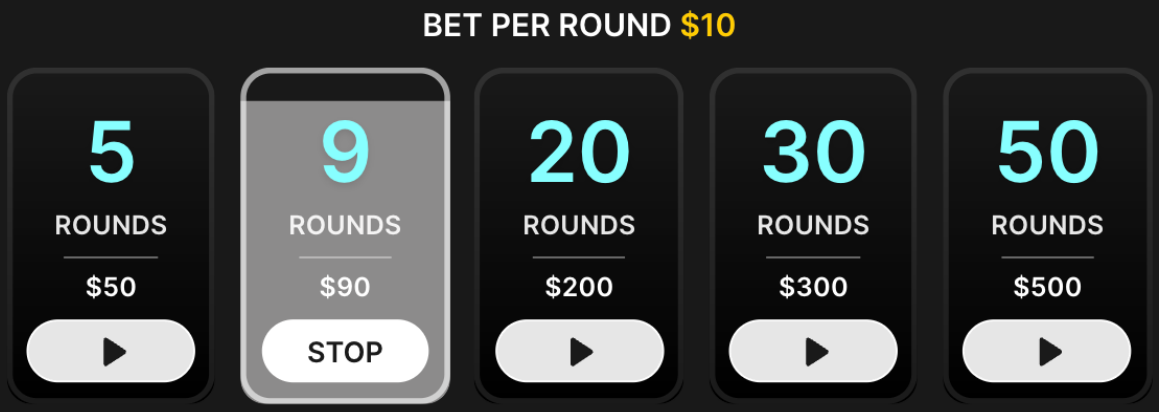

To start Autoplay, place your bets and then click/tap the Autoplay button.

In the Autoplay panel, you can start Autoplay by selecting the number of rounds you want your bets to be repeated for.

Your selected number of Autoplay rounds will be displayed on the Autoplay button. The number of remaining Autoplay rounds will be updated, once Autoplay is started.

Your total Autoplay bet amount is calculated by multiplying the number of Autoplay rounds with the value of your total bet. It is indicated under each Autoplay rounds card. Your remaining Autoplay limit will also be displayed under each Autoplay rounds card, once Autoplay has started.

Your automatic game rounds will continue until either your chosen number of Autoplay rounds are complete, or you choose to stop Autoplay by clicking/tapping STOP.

When Autoplay is stopped, you will be able to repeat previously selected bets and rounds by clicking/tapping REPEAT.

If you place additional bets on the betting grid or double your bets while Autoplay is running, a message will appear that will allow you to choose to continue Autoplay with your changed bets. If you don’t confirm to continue, Autoplay will be stopped.

Chat

Chat with other players and/or with a game presenter.

Game Number

Each game round is identified by a unique GAME NUMBER.

21:10:10

This number reflects when the game round began in terms of GMT by *hour: minute: second*. Please use this game number for reference (or take a screenshot of the game number) if you wish to contact Customer Service regarding a particular round.

Sound

Sound controls all sounds in the game.

Game History

Game History displays your Evolution game rounds and results.

Settings

Settings let you customize user preferences that are saved to your profile.

Deposit and Withdraw

Cashier for deposits and withdrawals.

Responsible Gaming

The RESPONSIBLE GAMING button allows you to access the page outlining the Responsible Gaming policy. This page provides useful information and links regarding responsible online gaming behaviour and how to set limitations to your game sessions.

Error Handling

If there is an error in the game, system or game procedure, the game round will be temporarily paused while the game host notifies the service manager. You and other players will be notified via Chat, or by an on-screen pop-up message, that the issue is being investigated. If the manager can immediately resolve the error, the game round will continue as normal. If immediate resolution is not possible, the game round will be cancelled, and the initial bets will be refunded to all the players who participated in the game round.

Disconnection Policy

If you are disconnected from a game round, any placed bets remain valid and are settled in your absence. Upon reconnecting, you can view the bet outcomes in the History window.

More Games

Evolution Lobby — easy game selection without exiting your current game until a new game is chosen.

Multi-Game Play

If you enjoy non-stop action, you can join more than one game table — then view and play them simultaneously, all in the same browser window!

After you have joined at least one game table, click on LOBBY. In the lobby or game, click the +TABLE button associated with that table to join it. Certain tables may be unavailable for multi-game play and will therefore not display a +TABLE button.

After you have joined multiple tables, you will be able to resize your browser window as a whole, but you will not be able to resize each game table window separately.

You can exit any table without affecting your presence at other tables you have joined. To exit a table, click the X button.

Please note:

- You will automatically exit a table if you join the same table through a different device/browser.
- If you click directly on a table icon instead of the +TABLE button, you will merely *switch* tables instead of joining the chosen table *in addition* to the table you joined previously.

We kindly advise you to join only as many tables as your screen can accommodate while still allowing you to place bets deliberately and accurately.

Shortcut Keys

Shortcut keys can be used to quickly perform useful game functions.

KEY	FUNCTION
Number Keys from 1 onwards	Select the desired chip from the chip display. Key “1” corresponds to the leftmost chip with the lowest value. Key “2” selects the next highest value chip, and so on.
SPACEBAR	Repeat your most recent bet. Press SPACEBAR a second time to double your bet.
CTRL+Z (CMD+Z), DELETE, BACKSPACE	Undo your last bet. Hold for 3 seconds to remove all your bets.
ESC	When applicable, the ESC key can be used to: • Exit full-screen mode • Close an open pop-up window (History, How To Play, Settings, etc.)
