Game Objective

Deal or No Deal is a unique game that blends fast-paced reels action with the thrill of a live game show, drawing inspiration from the well-known Deal or No Deal TV show.

The game's objective is to qualify for the live Deal or No Deal Bonus round and predict whether the amount of money in the last one of 16 briefcases will be higher than the banker's offer.

Game Rules

The game features three phases:

- Qualification
- Top Up
- Deal or No Deal Bonus round

Qualification for Game Show

The game begins with the Qualification phase, played using a three-reel, three-row machine with five fixed winlines, one Scatter symbol and nine paying symbols.

The goal is to land three Scatter symbols in one spin to qualify for the Deal or No Deal Bonus round. Scatter symbols may contain additional multipliers (up to 10x) that boost your total winnings.

Once you have successfully qualified, all Scatter multipliers are added together, creating a global multiplier which multiplies the amount in each briefcase in the Deal or No Deal Bonus round.

If a Scatter is on the top row, the next spin nudges it down to the middle row; if a Scatter is on the middle row, the next spin nudges it down to the bottom row; and if a Scatter is on the bottom row, it disappears on the next spin.

Please note: If the player changes the value of their bet during the Qualification phase, any Scatters collected are removed and saved with the

original bet value, and the Scatter collection is reset back to zero. The next time the player uses that bet value, the Scatters collected are restored along with the bet.

The saved data expires after 90 days.

You may still get payouts for winning combinations which are paid out according to the pay table.

View the pay table and winline info at any time by simply clicking/tapping the information icon or in How To Play.

The Qualification phase has three spin modes:

- Normal Spin (set by default)
- XXXtreme Spin
- Super XXXtreme Spin

To spin the Qualification reel, select your bet amount and click/tap SPIN.

- The bet selected in Normal Spin mode becomes your base bet and is used to calculate your winnings.
- Activating any of the two XXXtreme spin modes will help you qualify faster by guaranteeing one or two of three Scatter symbols each spin at the cost of an increased spin bet amount.
- Activating XXXtreme spin mode costs 15 times your base bet for one guaranteed Scatter symbol and increases the chance of getting Scatter multipliers by two times.
- Activating Super XXXtreme spins costs 75 times your base bet for three guaranteed Scatter symbols and increases the chance of getting Scatter multipliers.

- Payouts will be calculated using the base bet.

Top Up

Once you have qualified for the Deal or No Deal Bonus round and are waiting for it to begin, you have the chance to spin a Top Up wheel.

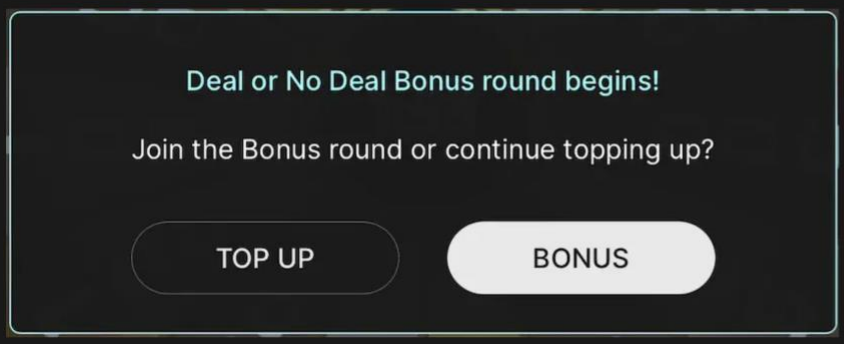

The Top Up phase features a 15-segment money wheel. Choose your bet, spin the wheel and top up the amount of money in the briefcase of your choice by 5x–50x of your bet!

You can spin the wheel an unlimited number of times until the end of the Top Up phase. You can also change the briefcase to top up before each spin.

By increasing your Top Up bet amount, you will also increase the value of multipliers on the money wheel.

If you join the Top Up phase a specific time before the Deal or No Deal Bonus round is about to begin, a pop-up message will appear on the screen.

Click/tap BONUS to join the Deal or No Deal Bonus round or TOP UP to stay in the Top Up phase and wait for the next bonus round.

If no decision is made, you will be transferred to the Deal or No Deal Bonus round automatically.

Deal or No Deal Bonus Round

During the Deal or No Deal Bonus round the banker will gradually open briefcases, revealing the number of the briefcase that is no longer participating in the game show. The banker will then make the DEAL or NO DEAL offers to you. There will be four offers made in total.

<u>First opening and offer</u>

Three random briefcases are opened, leaving 13 briefcases for the next phase of game. The banker will then make you a DEAL or NO DEAL offer and wait for your decision:

- If you choose DEAL, then the amount of money you won will be displayed in the winning message and added to your balance. At the same time you will be offered to return to qualification.
- If you choose NO DEAL, you continue to play.
- If you do not choose within the decision time, your decision will be interpreted as NO DEAL.

Second opening and offer

Four random briefcases are opened, leaving nine for the next phase of game. Again, the banker will make you a DEAL or NO DEAL offer and wait for you to make your decision.

Third opening and offer

Four more random briefcases are opened, leaving five for the next phase of game, followed by the banker's DEAL or NO DEAL offer.

Fourth opening and final offer

Three random briefcases are opened, leaving only two last briefcases. The banker then will make you a final offer with three options — DEAL, SWITCH BRIEFCASES or NO DEAL — and wait for you to make your decision.

- Choose DEAL to take the offer and collect your winnings.
- Choose NO DEAL and win the prize in the assigned briefcase.
- Choose SWITCH BRIEFCASES, if you believe that the amount of money is bigger in the other briefcase.

During the last opening, one of the two last briefcases is opened.

- If you chose NO DEAL in the banker's previous offer, you win the prize of your assigned briefcase.
- If you chose SWITCH BRIEFCASES, you win the prize of the other briefcase.

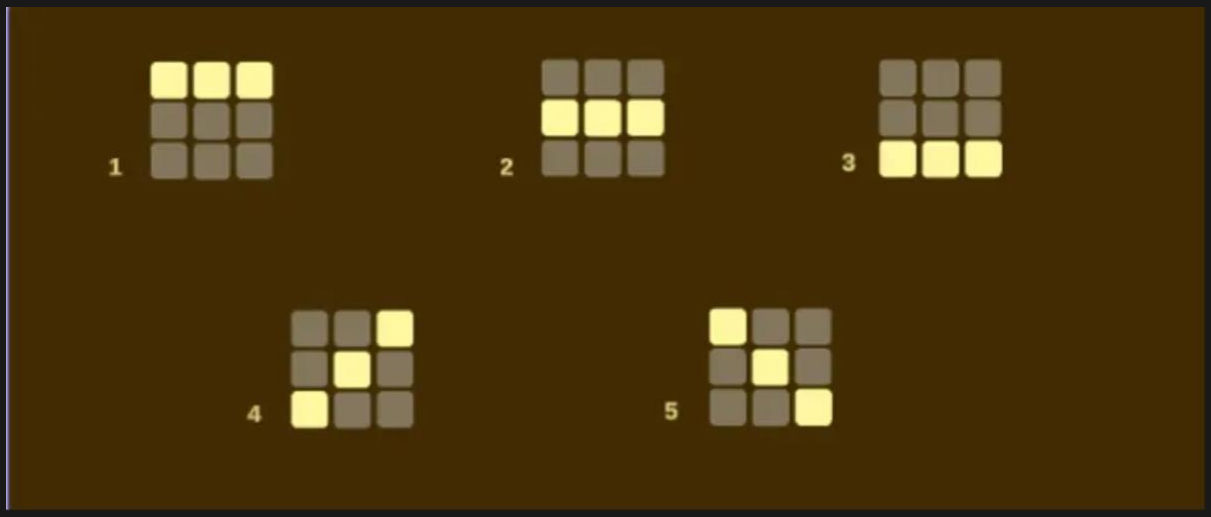

A message, displaying your winnings in the game show will appear and you will return to qualification.

Payouts

Qualification phase winlines are paid out immediately, unless the player qualifies.

Qualification reel winlines

The qualification reel has five fixed winlines

- Winlines pay if the symbols on them match the pattern in succession from the leftmost reel to the rightmost reel.
- There can be one or more winlines in the same spin. Simultaneous wins on different winlines are added together.
- Wild symbols can complete any winline. If multiple Wild symbols complete a winline, their multipliers are summed up, and the payout is multiplied by the combined total.

Symbol	Payout
	x3 = 5.0x
	x3 = 30.0x
	x3 = 75.0x
	x3 = 5.0x
	x3 = 3.0x
	x3 = 2.0x
	x3 = 1.5x
	x3 = 1.0x
	x3 = 0.5x

Players can win up to 75x their bet per spin with the option to top up their bet by 5x to 50x in the Top Up phase of the game.

The game has a theoretical payout cap defined and player's Top Up bets are checked against it before each Top Up spin. If this Payout cap is reached, certain bet values might not be available.

Malfunction voids all pays and play.

Return to Player

The optimal theoretical return-to-player percentage is 96.08%.

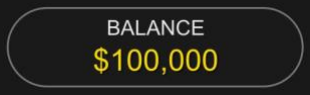

Bet	RTP
Normal Spin	96.04%
XXXtreme Spin	96.08%
Super XXXtreme Spin	96.07%
Top Up	95.42%

Place Bets

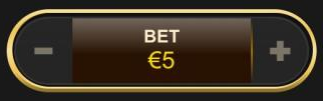

The BET LIMITS panel shows the minimum and maximum allowed bet limits at the table, which may change from time to time. Open the Bet Limits to check your current limits.

Deal or No Deal $5 – 1,000

To participate in the game, you must have sufficient funds to cover your bets. You can see your current BALANCE on your screen.

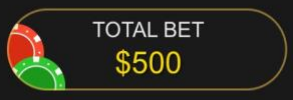

To make a spin, select your bet amount. Click/tap "+" or "-" to increase or reduce your bet or click/tap on the bet amount in the middle and select a bet amount from a scrollable list. Please note that the selected bet will be applied to each spin. If your balance becomes insufficient to place your selected bet, your bet will be automatically reduced to the highest available bet amount.

If you wish to enjoy the game at a faster pace, click/tap the TURBO button to accelerate the speed and shorten the spin time.

The TOTAL BET indicator displays the total amount of all bets placed in the current round.

Multi-Game Play

If you enjoy non-stop action, you can join more than one game table — then view and play them simultaneously, all in the same browser window!

After you have joined at least one game table, click on LOBBY. In the lobby or game, click the +TABLE button associated with that table to join it. Certain tables may be unavailable for multi-game play and will therefore not display a +TABLE button.

After you have joined multiple tables, you will be able to resize your browser window as a whole, but you will not be able to resize each game table window separately.

You can exit any table without affecting your presence at other tables you have joined. To exit a table, click the X button.

Please note:

- You will automatically exit a table if you join the same table through a different device/browser.
- If you click directly on a table icon instead of the +TABLE button, you will merely *switch* tables instead of joining the chosen table *in addition* to the table you joined previously.

We kindly advise you to join only as many tables as your screen can accommodate while still allowing you to place bets deliberately and accurately.
